MEDICHOICE®

Product Catalog

Connecting the world of medical products to the point of care.

Owens & Minor is pleased to present the 2016 MediChoice product catalog, an indispensible resource for medical professionals seeking top-quality products at affordable prices. Since rolling out MediChoice in 2002, we have enhanced and expanded the portfolio each year, and this issue is our best yet. We worked hard to make sure the catalog you now hold features the most products and the most-diverse set of suppliers to date—and we did this while keeping an eye on the evolving demands of today's healthcare professionals.

Innovation and Collaboration

Since putting out the last issue, we have been busy gathering feedback from administrators, technicians, nurses, and doctors in hospitals and clinics across the United States to see what more we could do to help them do their jobs effectively and efficiently. The voices have been diverse, but they all basically say the same thing: We need solutions that balance the needs of patient care *and* cost-saving budget initiatives.

We shared the input we received from you with our product development team, which in turn shared it with our manufacturers, all of whom were chosen because they meet our stringent requirements for quality, service, and value. We work to develop close relationships with those manufacturers, and that helps ensure we can keep delivering clinically accepted products that compare with leading brands.

From admissions to discharge and everything in between, know that each product was carefully selected by our trained product development team to ensure it's something you can purchase with confidence.

Want to know more about how MediChoice can work for you? Turn to the inside back cover of this catalog for a complete list of Owens & Minor locations, each with a team of representatives eager to put the power of MediChoice to work for you.

APPAREL—STAFF

At Owens & Minor we understand your need to have a full-line of Disposable Isolation Gowns and Face Masks that you can depend on to keep your staff and patients safe, without compromising quality, comfort, or durability. Our comprehensive line of MediChoice gowns come in a variety of back and wrist closures, with generous sizing, color options, and five levels of protection to match all levels of risk—from our least-expensive general cover gown, to the popular non-AAMI isolation gown, all the way up to the poly-coated, fluid-resistant gowns offering AAMI 3 and AAMI 4 protection. MediChoice face masks range from standard procedure masks to surgical masks with non-fogging visors, offering fluid resistance up to 160mm Hg.

Comfort Drives Compliance

All MediChoice gowns and face masks are made for comfort and ease of donning and removal, helping to reduce HAIs. With non-reimbursement, these savings go directly to your bottom line.

Savings Without Sacrifice

MediChoice offers a range of gowns and face mask options at a low cost—but you don't sacrifice what matters most: protection and comfort. By standardizing to MediChoice gowns and face masks, you simplify your supply chain with reduced SKUs to manage and inventory.

PERSONAL PROTECTION EQUIPMENT

MediChoice Personal Protection Equipment Organizers help protect staff and patients by providing a solution to keep PPE items visible, stocked, and easily accessible. They are available for holding MediChoice gowns, gloves, face masks, and additional supplies.

Versatility

Increase compliance by mounting the Protection System to the wall outside of each patient room and high traffic areas so protective equipment is visible and available to protect staff at all times.

- **Permanent**—Designed to be used for standardization of location of protective equipment for everyday protection by placing units permanently on walls outside of patient rooms.
- **Portable**—The Protection Systems can be hung intermittently on patient doors and are a cost effective adjunct to existing isolation carts.
- **Essential Infection Control Signage**—Clip-on sign holders can be added to units to ensure proper isolation is initiated and maintained.

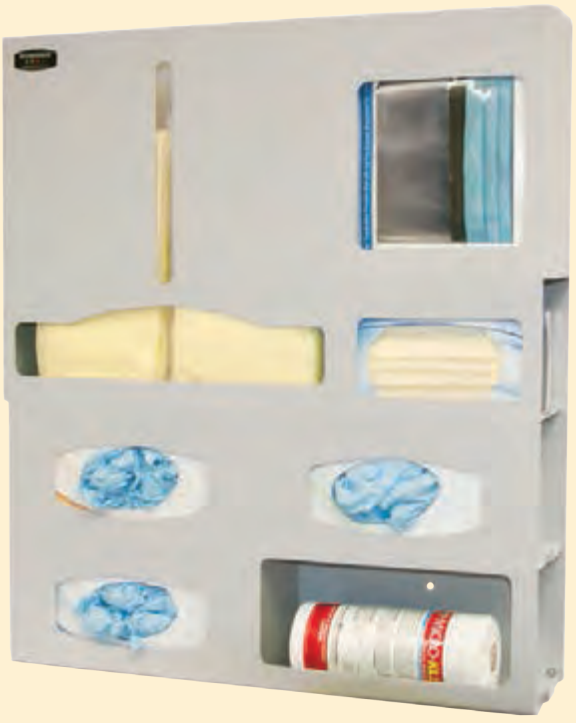

Convenience & Accessibility

MediChoice Protection Systems provide a versatile option for standardizing the location of PPE (Personal Protective Equipment) supplies in patient care areas.

- **Visible Cue**—Supplies are highly visible to staff and visitors, helping to improve compliance with isolation policies related to PPE donning, thereby helping to decrease the potential for costly HAIs (Healthcare Associated Infections).
- **Easy Access**—The unit has no doors or drawers allowing for easy access and visualization of consumable products.
- **Save time and money**—Protection Systems provide organization of PPE supplies, reducing clutter in high traffic areas by mounting units on walls or doors located near patient rooms, minimizing the potential for delaying the restocking process and blocking entry and exit ways.

RESPIRATORY HYGIENE STATIONS

MediChoice Respiratory Hygiene Stations help facilities protect patients, visitors, and staff by providing a solution to stock items needed to support efforts in preventing the transmission of infections. They are available for holding MediChoice face masks, hand sanitizing gel, and facial tissues.

Versatility

Most units may be mounted to a floor stand, hung on a wall, or set on a counter. Essential infection control signage can vbe added to units to ensure proper isolation is initiated and maintained.

Convenience & Accessibility

Hygiene Stations can be placed where infection prevention supplies are needed most—all ports of entry or near an elevator, hanging on a wall.

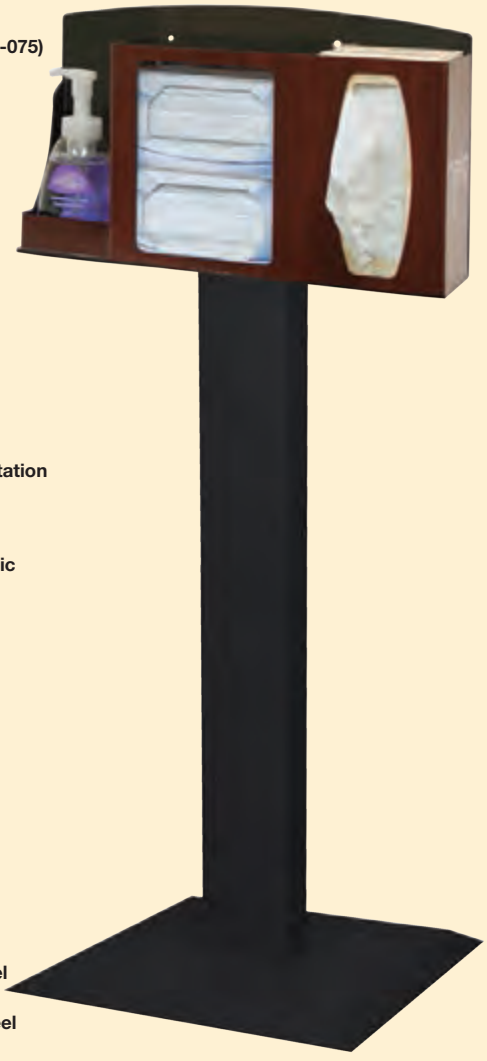

RS001-0212
Accommodates either one bottle of hand sanitizing gel or one container of hand sanitizing wipes.

Optional sign holder (MP-075 shown, or MP-070) sold separately.

MP-070
Sign Holder Vertical

Optional sign holder (MP-070 shown, or MP-075) sold separately.

BLOOD PRESSURE

Blood Pressure Cuffs (Single-Patient Use)

NOT MADE WITH natural rubber latex

- Soft fabric cuffs provide patient comfort and are color-coded for easy identification by size
- Single-patient use aids in reducing the risk of cross-contamination and adherence to infection control protocols
- Range guide on outside of cuff directs clinicians to use an appropriately sized cuff to help prevent misreading of blood pressure due to incorrect size
- Centered tube bladder helps clinicians achieve optimal arterial compression
- Cuff includes a gauge holder for manual blood pressure use
- Manufactured in compliance with FDA Quality System Regulation 21CFR Part 820; ISO 13485:2003, Medical devices. Meet ANSI/AAMI Standard SP10: 2002

Ultrasound Gel

NOT MADE WITH natural rubber latex | diverse supplier

- Bottles designed to feel soft and easy to squeeze; help to minimize repetitive motion that can lead to clinician fatigue
- Both premium and standard gels available in convenient 8 ounce squeeze bottle and 5 Liter container
- Bacteriostatic, water soluble, and perfume-free
- Contains no oils, alcohols, silicones, or fragrances that may harm the transducer
- Provides optimal sound velocity and acoustic impedance during ultrasound procedures
- Proprietary manufacturing method minimizes the presence of air bubbles in the gel for increased image clarity
- Sized to fit standard gel warmers
- Non-sterile, for external use only
- For use only with ultrasound equipment, not for use with automatic or external defibrillators
- Highest quality ultrasound gel made in North America
- Premium Ultrasound Gel
  - Higher viscocity recommended for vascular and echocardiography applications
  - Light glacial blue tint reduces the potential for staining equipment, clothing, and bedding while providing contrast against patient skin
  - Additional thickener inhibits the gel from drying and becoming tacky
  - 20g Individual Packets
    - Single patient packaging is designed to help prevent cross contamination from gel being used on more than one patient
    - Helps reduce the risk of nosocomial infection associated with cleaning, refilling and reusing gel bottles
    - Packets can be warmed in standard gel warmers
- Standard Ultrasound Gel
  - Lower viscosity recommended for abdominal and OB/GYN applications
  - Light aqua blue tint reduces the potential for staining equipment, clothing and bedding while providing contrast against patient skin
  - Non-slip formula makes testing fast and accurate
  - Lower viscosity recommended for general purpose, abdominal and OB/GYN procedures

Electrodes (Defibrillation)

NOT MADE WITH natural rubber latex

- Radiolucent to allow for easy, cost-effective use throughout the hospital in less clinically sensitive areas
- Compatible with biphasic defibrillators
  - Standard ISO 9001 (1994)
  - Size: 5.63 × 3.88 Inches
  - Canadian Medical Device Regulations
- Complies with ANSI/AAMI Standard DF39 (1993)
- Wire coating contains PVC
- Non-Sterile
- No adapters required—direct connect to defibrillator cable
- Functionally equivalent to various other brands of defibrillation electrodes
- Product made of vinyl laminated foam, conductive foil, and conductive adhesive hydrogel
- MediChoice adult defibrillation electrodes comply with the following medical device requirements:
  - United States 'Quality System Regulation' (21 CFR 820)
  - European Community's Council Directive 93/42/EEC (MDD) for CE marked products
  - Standard EN 46001 (1996)

Vaginal Specula

NOT MADE WITH natural rubber latex

- Allows examination of vaginal mucosa at 360-degree angle without rotation
- VAG1000 series made from sturdy, clear non-toxic polystyrene
- VAG2000 and VAG3000 series are both made from clear, sturdy, non-toxic polymer blend of polycarbonate and polystyrene
- VAG1000 series has a silent slide and lock mechanism that is self-holding in various open positions and allows for one-handed operation
- Both the VAG2000 and VAG3000 series have built-in locking mechanisms for both elevation and angulation adjustment
- VAG2000 series is compatible with most corded light sources
- VAG3000 series features a fixed, built-in, LED light-source that is powered by 3 alkaline batteries
- VAG3000 series features on/off push-button operation of the light for extended battery life
- VAG3000 series has 30 minute battery life in continuous operation; can be turned on and off as desired during use for extended battery life
- All series provide a wide range of angular and elevational adjustability
- Disposable, single-patient use decreases the risk of contamination
- Non-sterile

GLOVES

In today's competitive climate, medical professionals need to cut costs wherever possible, and high-volume commodity items like gloves are a great place to look for savings. However, careless cost cutting can lead to lower quality and higher incidents of failure. MediChoice exam and high-risk gloves, on the other hand, offer significant savings without sacrificing quality—or comfort.

Glove-Selection Guide

Gloves come in many varieties, and each one has a job it's best suited for.

Vinyl exam gloves are a good choice for simpler, low-risk tasks where exposure to blood or other bodily fluids is unlikely. Examples include administrating injections, routine suctioning, basic patient examinations, food handling and low-risk housekeeping activities. Vinyl gloves also come in a stretchy version with added polymers that make them feel closer to latex.

Nitrile gloves are ideal for moderate to high-risk situations where exposure to blood, bodily fluids, and other potentially infectious material poses a risk to healthcare workers. Like latex, nitrile gloves form tightly to the hand and can be used for precise tasks without the exposure to latex proteins, which for some clinicians and patients can create allergic reactions.

Latex, or natural rubber gloves, provides a high level of barrier protection and performs well in moderate to high-risk situations where there is potential for touching blood, bodily fluids, secretions, excretions and items visibly soiled by bodily fluids. They are ideal for wearers that change gloves frequently, wash hands repeatedly, or wear gloves for an extended period of time.

Latex Exam Gloves

- Non-sterile, ambidextrous, powder-free, single-use
- Beaded cuff for added strength and ease in donning
- Textured finish provide strong grip-strength for wet and dry applications

Can Liners

made in the USA | NOT MADE WITH natural rubber latex

- Made from highest quality raw materials
- Material reinforced to enhance physical properties
- Strong "star" seal minimizes leaking and maximizes carrying capacity
- Top-side dual dispensing boxes for easy access
- High-performance standards for dry/wet load capacity, tear and impact specifications
- LLDPE—Linear Low Density Polyethylene. Excellent resistance to puncture and tearing.
- HDPE—High Density Polyethylene. High resistance to puncturing.

Fecal Occult Test (iFOB)

made in the USA | NOT MADE WITH natural rubber latex

- Qualitative immunoassay test for the determination of human hemoglobin in patient fecal specimens.
- The hema-screen™ SPECIFIC features an innovative sampling method that utilizes one card for collection of two (2) fecal specimens and uses only one (1) immunochemical specimen preparation tube/test cassette system for analysis
- Meets the American Cancer Society and the U.S. Task Force for Colorectal Cancer (CRC) Foundation recommendation of multiple-day testing
- The sampling tab technology replaces unpleasant liquid buffer tubes and eliminates human error due to patient oversampling
- Specific for human hemoglobin, eliminating interactions from red meat, vitamin C, and other factors which may lead to false positives test results
- Excellent 30-day stability
- 24-month shelf life from date of manufacture
- CLIA waived

ELASTIC BANDAGES

Knit Elastic Bandages

NOT MADE WITH natural rubber latex | diverse supplier | sterile EO

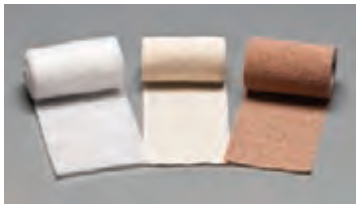

- Cool and comfortable cotton bandage
- Suitable for general support and compression
- Length is stretched length
- Color-coded for easy size identification
- Ideal secondary bandage
- Knitted construction provides superior absorbency and breathability
- Heavy gauge yarn and cotton covered spandex for superior tensile strength and compression
- Resistant to deterioration from ointments and medications
- Scalloped edges prevent rolling
- Double self-closure allows swift and easy application during surgical procedures
- Stretch enables bandage to better conform to applied surface
- Available with dual self-closure flaps or metal clip closures

COMPRESSION BANDAGE SYSTEMS

3-Layer Reduced Compression Bandage System

NOT MADE WITH natural rubber latex | diverse supplier

- 3-Layer system for optimum compression and absorbency in the treatment of venous leg ulcers of varying stages
  - Layer 1: Non-woven absorbent padding for comfort and protection of bony joints
  - Layer 2: Breathable cotton/poly crepe conforming bandage anchors and smoothes padded layer while absorbing exudate
  - Layer 3: Self-adhering cohesive bandage secures system together
- Pressure: 17-25 mm/Hg
- Three individually packaged layers in a resealable pouch
- Adhesive tape strips and detailed instruction guide included

Thin Hydrocolloids

NOT MADE WITH natural rubber latex | sterile EO

- Promotes moist wound healing by facilitating tissue granulation, epithelization and autolysis while minimizing skin maceration
- Dressings are lower profile and thinner than other hydrocolloids, yet have the capacity to manage fluid in excess of traditional thin hydrocolloids
- Super thin dressing is only 0.1mm in thickness
- Thin Absorbent Skin Adhesive (TASA) technology creates superior performance and fluid handling capacity and breathability
- Completely transparent, allowing for easy wound site visualization; minimizes the need for frequent dressing changes, therefore extended wear time
- Low-friction polyurethane cover helps prevent skin shear
- Skin-friendly dressing formulated to be gentle to periwound skin

Standard Hydrocolloids

NOT MADE WITH natural rubber latex | sterile EO

- Promotes moist wound healing by facilitating tissue granulation, epithelization and autolysis while minimizing skin maceration
- High fluid handling capacity in a thin and conformable dressing provides long-term wear and fewer dressing changes
- Flexible design allows the dressing to easily conform to the body, ultimately enhancing patient comfort
- Rounded corners help to prevent edge lift
- Formulated to be gentle to periwound skin

HYDROCOLLOIDS

Odor Control Hydrocolloids

NOT MADE WITH natural rubber latex | sterile EO

- Promotes moist wound healing by facilitating tissue granulation, epithelization and autolysis while minimizing skin maceration
- Thin border with integrated high adhesion formulation ensures a low profile and enhanced dressing securement
- Central island with odor-absorbing technology provides exceptional fluid handling capacity with the added benefit of odor management
- Two layers for maximum absorption (0.6 MM center)
- Can remain in place several days; fewer dressing changes and less disturbance to the wound bed
- Rounded corners help to prevent edge lift
- Flexible design allows the dressings to easily conform to the body, ultimately enhancing patient comfort
- Sacral dressing is designed specifically for use in the highly contoured sacral area

Sustainability + Owens & Minor

As a leading healthcare logistics company, we are committed to environmentally responsible business practices. It's our core business to aggregate multiple, disparate supply chains into a single, efficient delivery channel. This means we ship with more complete truckloads and ultimately reduce the number of direct, single-vendor delivery trucks required to serve our customers' daily needs.

Our Portland, Oregon distribution center models our commitment. It reuses 90% of packing materials—redistributing used pallets, recycling 15,000 in 2015—and recycles more than 175 tons of cardboard and nearly 10 tons of plastics and paper each year.

Because we manage approximately 7 million square feet of warehouse and office space and a private fleet of 360 delivery vehicles, we have an opportunity to positively impact the environment through sustainability programs that focus on efficiency in fleet management, recycling, and energy consumption reduction.

We are proud that the Owens & Minor fleet was awarded the highest grade for energy efficiency by the EPA's SmartWay Transport Partnership.

Supplier Diversity + Owens & Minor = A MediChoice Advantage

Owens & Minor has an established commitment to advancing supplier diversity. Within the healthcare industry, we have earned a highly regarded position due to the tangible impact and contributions derived from our relationships with minority-, women-, and veteran-owned business enterprises. Investing in supply chain diversity is a business imperative that benefits our provider customers, the suppliers and the community. We believe a thriving community of diverse suppliers generates healthy competition and innovation, and can optimize the supply chain and drive out cost, which positively impacts shareholder value.

The MediChoice brand has grown as a function of our dedication to providing high-quality products to the point-of-need in the most streamlined, cost-effective way possible. And we do all this with superior service levels. Likewise, our commitment to supplier diversity in our sourcing relationships has grown with it. Currently, products sourced from diverse suppliers account for nearly one-fourth of MediChoice sales. By choosing MediChoice, hospitals realize significant savings while advancing their organization's supplier diversity goals.

This Diversity Supplier indicator can be seen throughout the catalog.

About MediChoice®

MediChoice is Owens & Minor's brand of medical-surgical products and durable medical equipment that is expanding to meet the changing needs of healthcare. The MediChoice product portfolio reflects Owens & Minor's longstanding commitment to building strong and diverse supply chain relationships with leading manufacturer partners. Products we source from women-, minority-, and veteran-owned businesses make up over one-third of the MediChoice product line.

By offering a single brand for thousands of regularly purchased items, MediChoice can increase efficiency and support product standardization initiatives. With MediChoice, the savings can be immediate. Our competitively priced products save hospitals an average of 10 percent on the most regularly purchased supplies. With near-perfect fill rates, MediChoice customers get premium service on common items while controlling their supply spend.

Let MediChoice help you meet your patient-care needs, and solve your budget concerns.
