Standards in Personal Protective Equipment: The Last Line of Defense

Join us for a complimentary
Live Q & A on October 7, 2021 | 1:00-2:00 PM EDT

1.0 contact
hour for RNs

OVERVIEW

During National Healthcare Supply Chain Week, Owens & Minor recognizes #ThePowerIsYou and is offering complimentary education to show #ThousandsofThanks to supply chain leaders.

This live, interactive, "Ask the Expert" program will answer your most challenging questions regarding the appropriate use of Personal Protective Equipment. In addition, product selection criteria and ratings will be reviewed.

OBJECTIVES

- Discuss the different types of PPE available for healthcare providers
- Review the appropriate procedures for donning and doffing PPE
- Discuss the important PPE selection criteria to ensure healthcare team member safety and proper usage

WEBINAR PRESENTER

Dr. Hudson Garrett Jr. PhD, MSN, MPH, FNP-BC, IP-BC, CPPS, CFER, FNAP

The President and CEO of Community Health Associates, LLC, Dr. Hudson Garrett has a faculty appointment as an adjunct assistant professor of medicine in the Division of Infectious Diseases at the University of Louisville School of Medicine. He is a frequent international lecturer in the areas of infectious diseases, healthcare-associated infections and infection prevention and control. He is board certified in Patient Safety and Infection Prevention and Control. Dr. Garrett is also a member of OSAP/DANB Infection Control Certificate and Certification Steering Commission (ICCCSC).

OVERVIEW

During National Healthcare Supply Chain Week, Owens & Minor recognizes #ThePowerIsYou and is offering complimentary education to show #ThousandsofThanks to supply chain leaders.

This webinar program will review the necessary steps of product evaluation to incorporate infection control best practices, regulatory and accreditation requirements, and also evidence-based usage for all healthcare settings. The use of infection control products across the continuum of care is an important element of reducing risks to patients.

OBJECTIVES

- Discuss the necessary steps in product evaluation to mitigate infection transmission
- Review the need for an interprofessional approach to product selection
- Discuss the impact of evidence-based practice in the selection, evaluation, and implementation of infection prevention and control-related products
