A True Revolution In Inventory Management Has Arrived

QSight® is an industry-leading, cloud-based inventory management solution that combines easy-to-use technology with powerful reporting capabilities to transform how you manage your supply chain.

Powered by Owens & Minor's people, processes and technology, QSight's state-of-the-art capabilities and robust reporting help you take your supply chain to the next level, while also:

- automating time-consuming manual tasks
- controlling costs
- enhancing patient care

Benefits Throughout The Supply Chain

Start with a department and grow at your own pace across your entire health system, with the ability to:

- Increase charge capture
- Improve clinical documentation accuracy
- Make smarter decisions based on data
- Enhance clinical workflows

It's Beyond Inventory Management. It's Proactive Business Automation.

Utilizing QSight's smart scan technology, all your team needs is a web-connected device and a barcode scanner to capture data. With access to our proprietary global item master database, a single scan matches a product to one of over 600,000 unique SKUs, providing descriptions, lot numbers, expiration dates and more—immediately and without error. Simply point and scan any item of clinical inventory and QSight does the rest.

SCAN

As inventory items arrive, clinicians simply scan packaging barcodes with a hand scanner.

MATCH

QSight matches those items to a database and returns relevant product information such as UDI, lot, serial number and expiration date.

MANAGE

Information is immediately captured in QSight and reflected in your inventory levels.

VISIBILITY

Simplicity On A Single Screen

- Complete visibility of inventory
- Critical information at your fingertips
- Intuitive dashboards
- Alerts that are actionable

A Complete View Of Your Supply Chain Is Now Faster Than Ever Before.

QSight provides users with unparalleled visibility into their supply chain, turning inventory into data that enables smarter, more informed and impactful decisions.

AN INTERACTIVE DASHBOARD FOR CLARITY

The easy-to-read QSight dashboard provides a single view of all inventory data.

At a glance, immediately see overstocks, understocks and backorders, while tracking usage and trends at a system-wide level. And with just a few clicks, you can drill down to the individual product level—and even order more, directly through QSight.

AN ENHANCED APPROACH TO PATIENT SAFETY

QSight technology helps to improve patient safety by providing real-time, automated alerts for products that are soon-to-expire, expired or recalled.

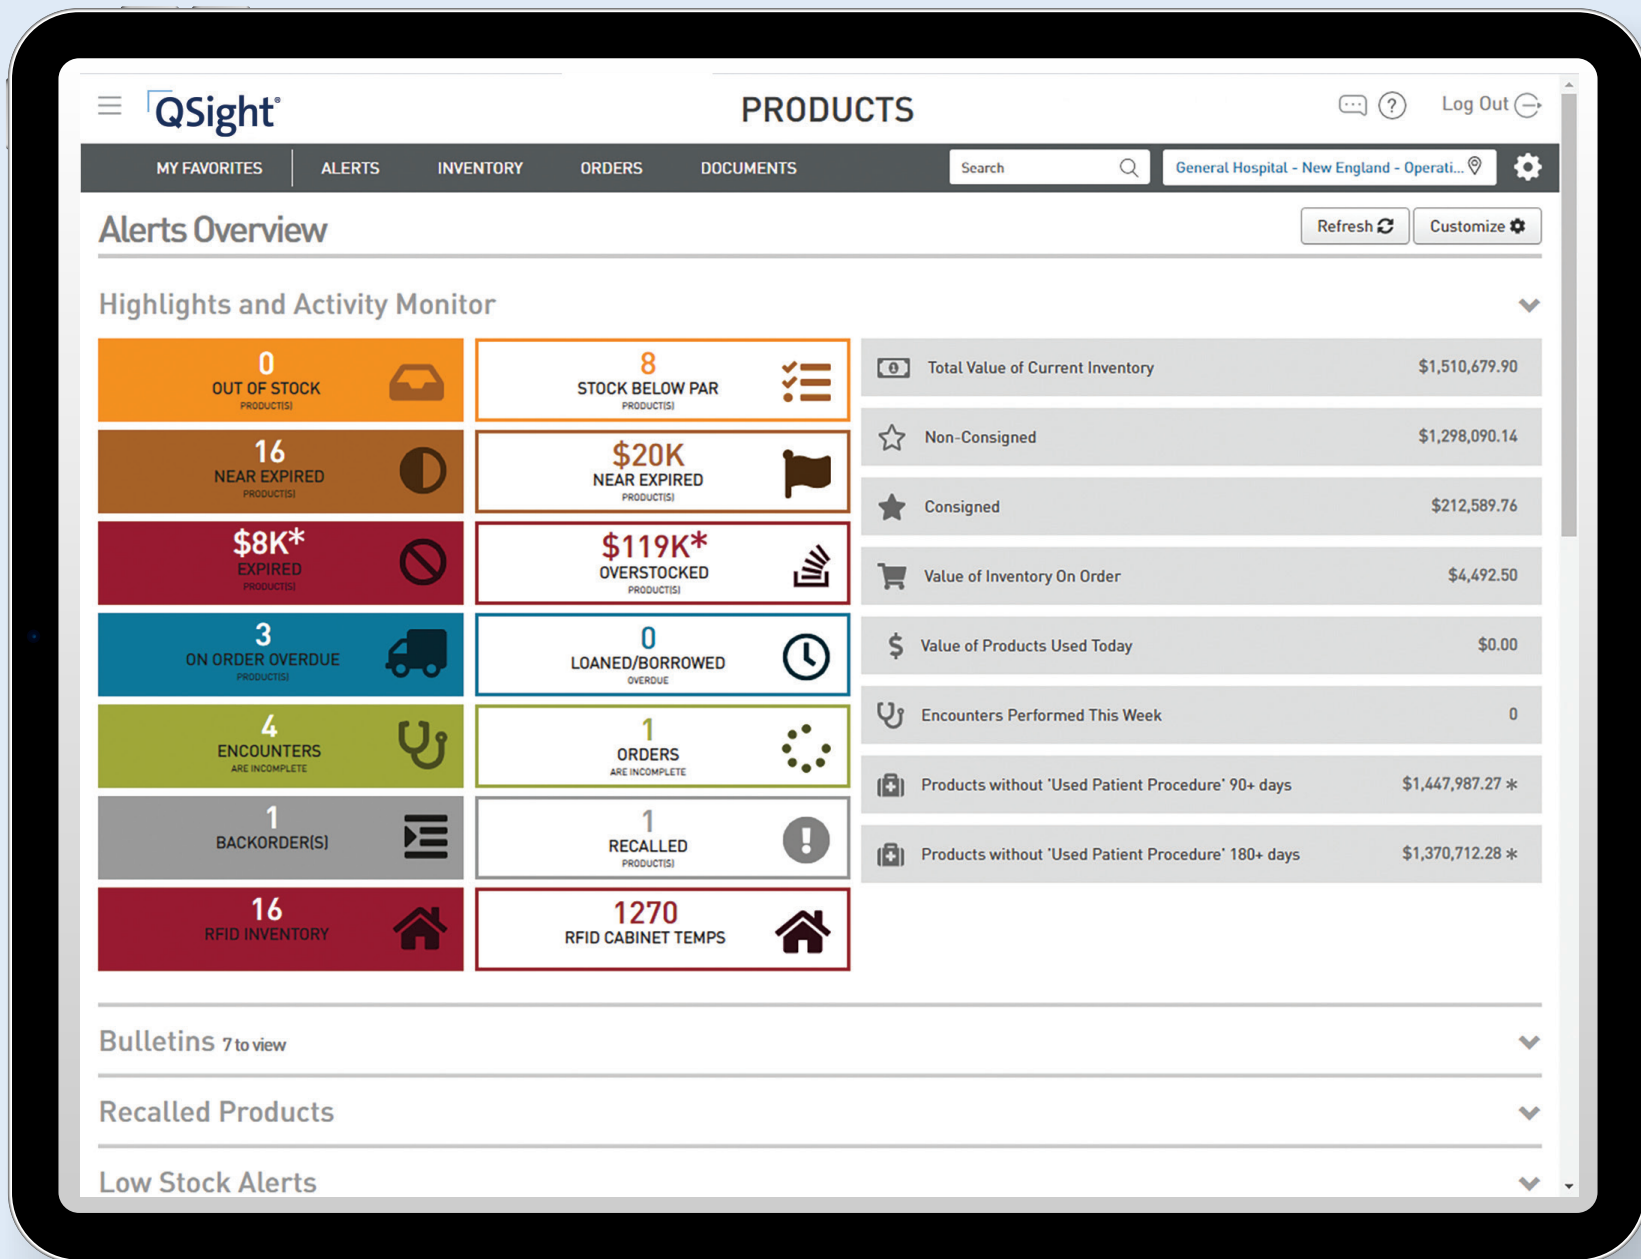

These automated alerts provide a much-needed safeguard against the physical and financial risks of expired or recalled products' being selected for patient use. In addition to mitigating risk, QSight safeguards the chain of custody for human tissue and implants, streamlining the process of documenting supplies and implants in the clinical record and patient's EHR. QSight is compliant with AATB, FDA and The Joint Commission regulations for bone and tissue tracking.

AUTOMATED ALERTS

Solve Problems Before They Become Problems

- Receive real-time insights
- Identify issues instantly
- Take corrective actions immediately

One System With Nearly Limitless Power.

It takes an extraordinary amount of technology and experience to create a system as powerful as QSight. And it takes Owens & Minor—the industry leader in providing great customer service—to make it all work seamlessly.

EASY TO IMPLEMENT

QSight integrates with existing systems easily—even other third-party systems. Our dedicated team of technology experts understands the full spectrum of hospital protocols, making implementation rapid, stress-free and ready to use in as little as 60 days.

COMPLETELY CLOUD-BASED

Because QSight is cloud-based, your IT department is not tasked with maintenance or upgrades. Plus, additional investment in servers or other IT infrastructure is not required.

SIMPLE SCALABILITY

With QSight, you can quickly scale up to other departments and hospitals. Its easy-to-understand, intuitive user interface and exceptionally fast time-to-value allow your team to be up and running quickly.

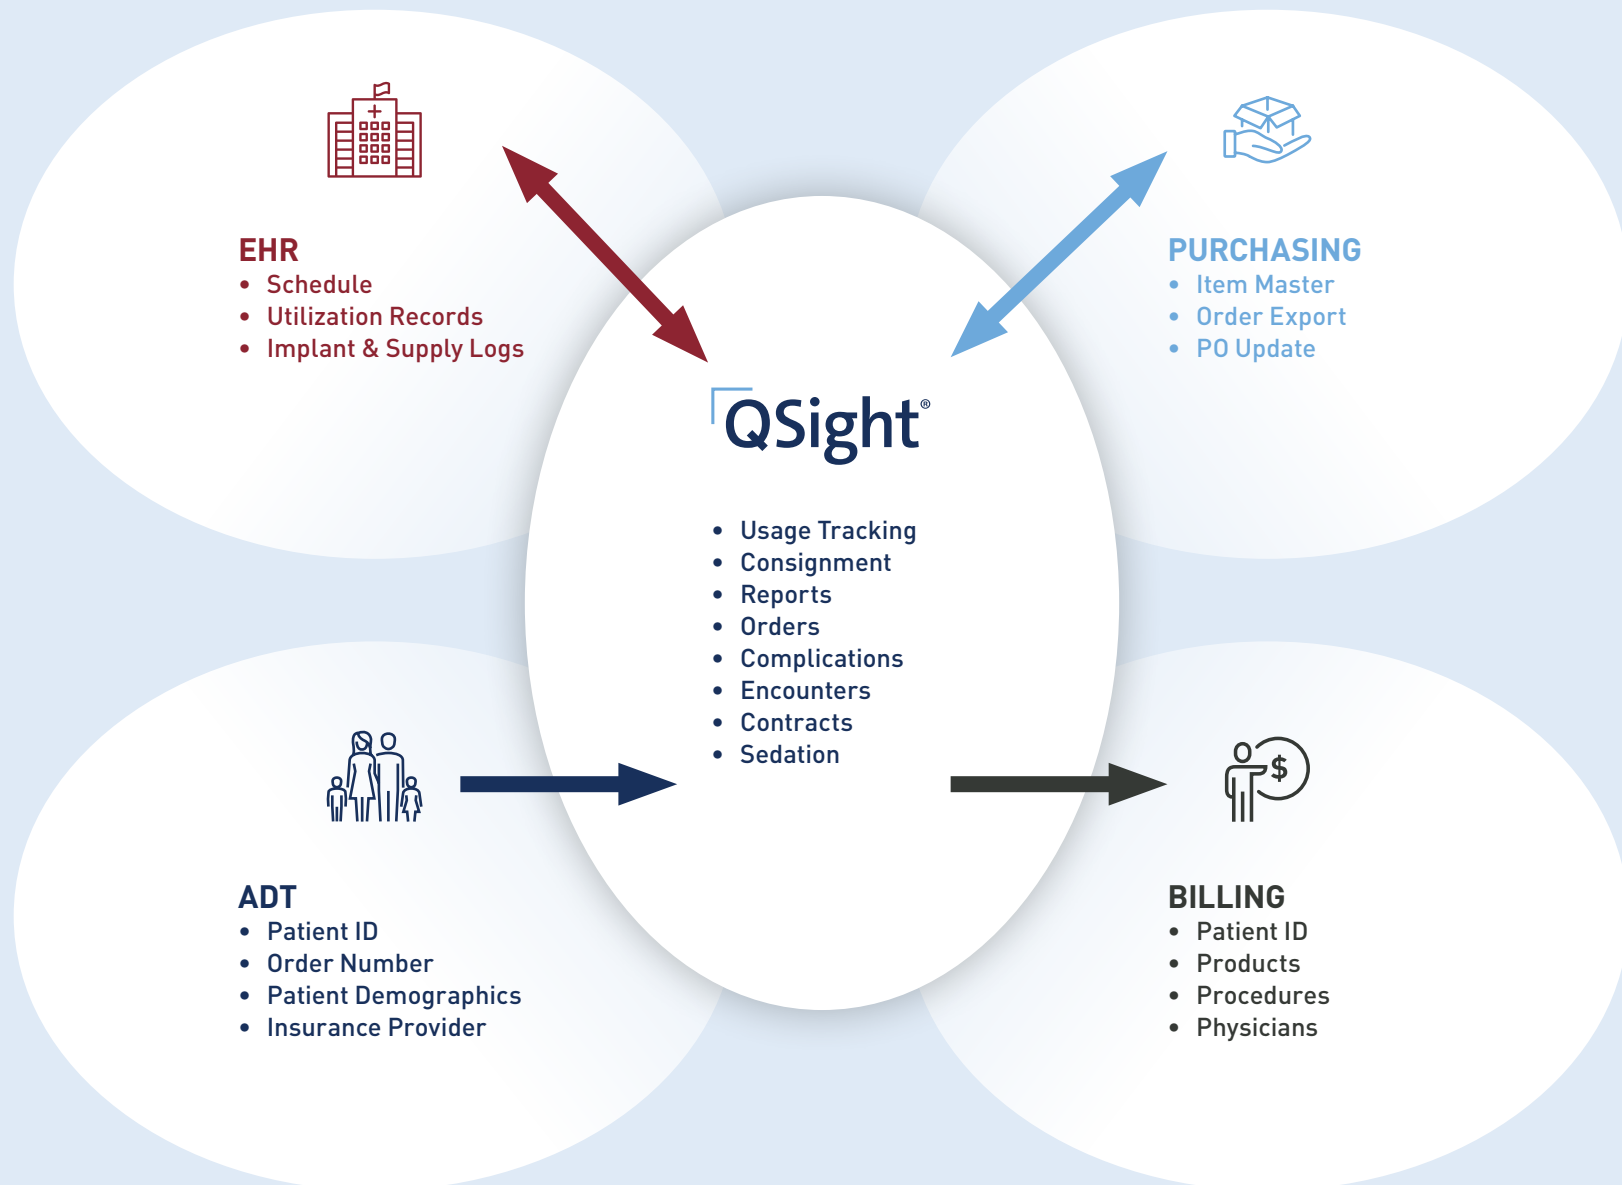

SINGLE SOLUTION

No More Switching Between Multiple Solutions

QSight integrates with your existing systems, acting as a bridge and allowing you to directly perform critical functions.

- Interoperability between legacy systems
- Single sign-on for easy access
- Ability to perform critical functions directly in QSight

Don't Be Controlled By Your Supply Chain. Take It To The Next Level.

Today, technology is crucial to providing high-quality, patient-centered care. But technology is also a crucial element in the day-to-day running of a hospital and the supply chain that serves its needs. QSight's revolutionary approach to inventory management makes it easier than ever to simplify these complex supply chain challenges, while bringing measurable benefit to your bottom line.

→ INVENTORY REDUCTION

Users are automatically prompted to order inventory that's needed, simplifying the inventory management process.

→ INCREASE CHARGE CAPTURE

Precise charging through barcode scanning minimizes errors.

→ MAKE BETTER, SMARTER DECISIONS

QSight's rich inventory data gives you the insights to make smarter decisions.

→ ENHANCE PATIENT SAFETY

Automatic alerts notify you of recalled, expired and expiring products so that you can take appropriate action to ensure they are either not used or used before expiration.

PATIENT-CENTRIC

Better Financial Outcomes— And Better Patient Care

QSight immediately impacts your organization, reducing overstocks, simplifying inventory management and creating significant savings. With automatic alerts for recalled, expired and expiring products, you can proactively reduce your annual spend with ease.

Just as important, leveraging the data and insights of QSight's reporting promotes better outcomes at both the patient and the facility levels. And when clinicians spend less time on inventory management and more time providing care, everyone wins.

SIMPLIFY YOUR SUPPLY CHAIN TODAY

With a single, easy-to-access, real-time view of your clinical inventory, QSight transforms your supply chain into a source of actionable insights to move your entire enterprise forward.
